

WORKSAFE ENGAGES WITH EBLUEPRINT TO COLLABORATE ON DIGITAL PORTAL PROJECT

November 20th 2015
Melbourne, Australia

eBlueprint is pleased to announce that we have recently been given the opportunity to collaborate with WorkSafe on a digital project utilising portal technologies. WorkSafe's infrastructure was out of vendor support and becoming an increasing challenge, inhibiting the efficiency of their business. eBlueprint has been engaged to architect a new portal infrastructure to replace their legacy systems.

Our solution will give WorkSafe an opportunity to consolidate and standardise their business processes, whilst providing a more streamlined infrastructure, with an improved user experience and more robust security.

Given WorkSafe's importance in the lives of many Victorian employees as the body for promoting and enforcing occupational health and safety in their workplaces, it is eBlueprint's pleasure to accept this opportunity in assisting WorkSafe to maintain the quality of their business practices.
